Contents

What are we going to cover?

Section One:
What is the problem?

Section Three:
Solving the problem

'Base Pay'

A. basic_salary

B. car_allowance

C. travel_or_daily_allowances

D. holiday_pay

't-yrn-csp'

A. car_allowance

B. sick_pay

C. maternity_pay

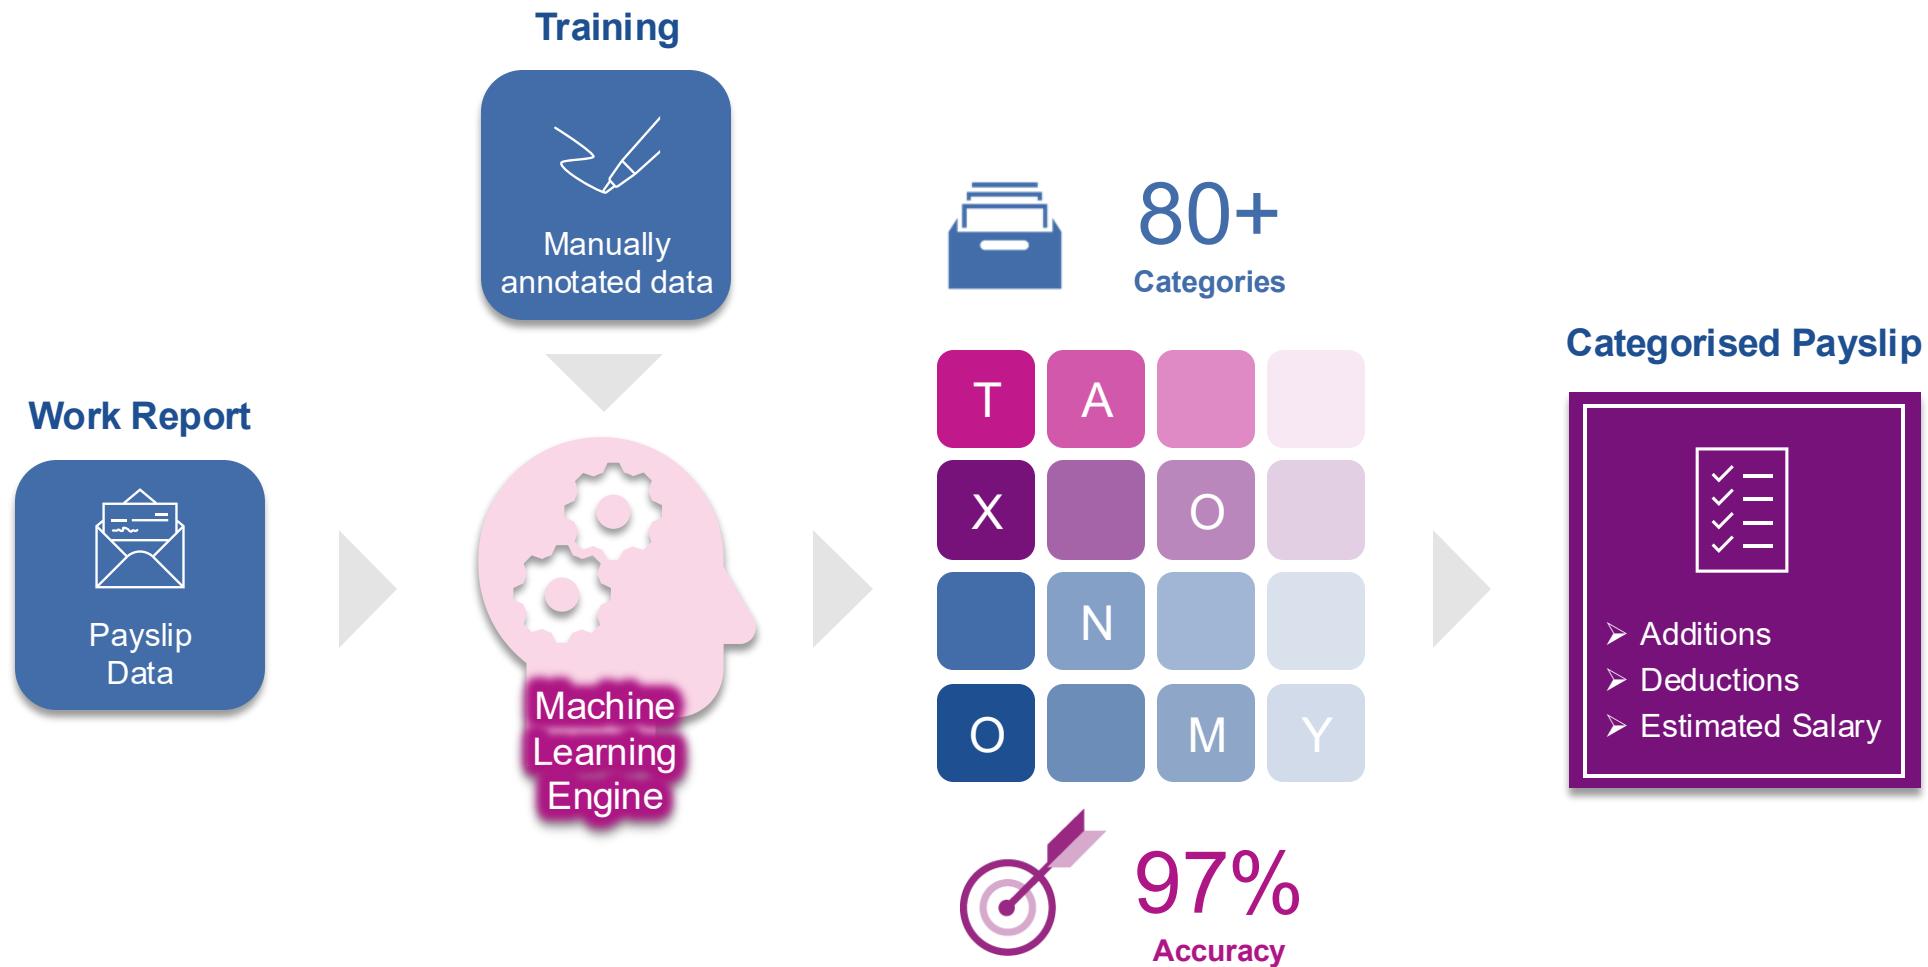

D. salary_sacrifice

The Problem

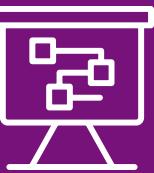

Introduction to CaaSPay

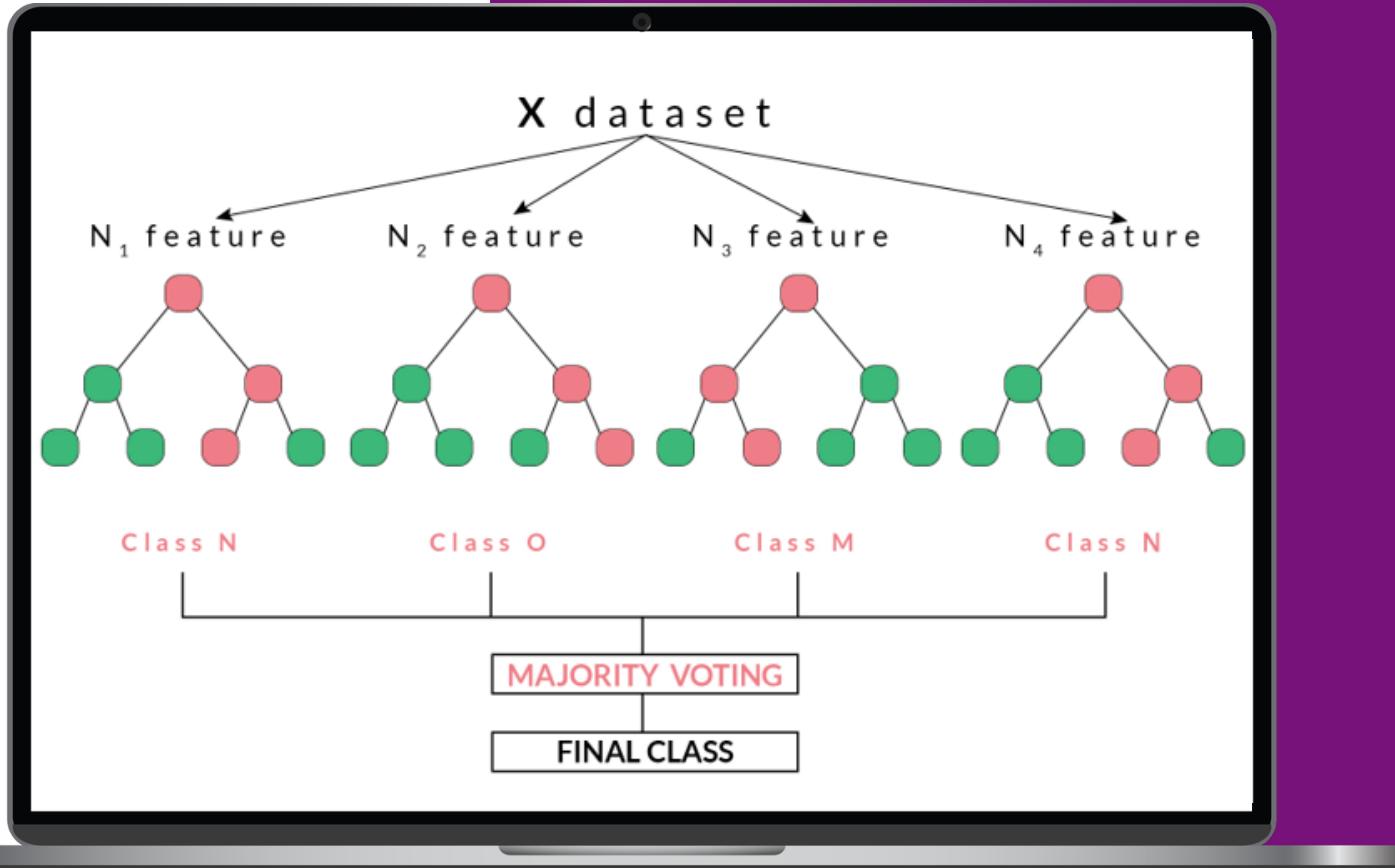

Under the hood

Introduction to CaaSPay

Random Forest Classifiers

- Supervised Learning
- Random Forest builds multiple decision trees to improve prediction accuracy and reduce overfitting
- Each tree trains on a random data subset using bootstrap aggregating to introduce diversity
- Random selection of features at each split reduces correlation and enhances model generalization
- Final prediction is based on majority vote from all trees, improving robustness and accuracy

Solving the Problem

Standardisation of payslip data

30,000+

unique labels describing payslip
income & deductions
examples:

s.s.p

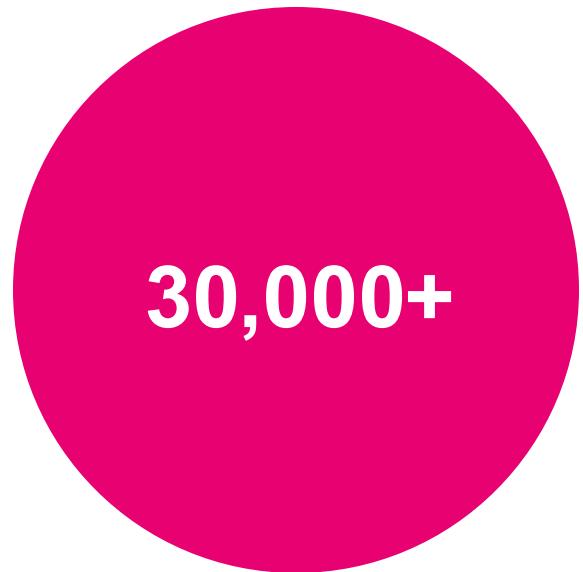

a sick pay hours

occupational sick pay

Solving the Problem

Standardisation of payslip data

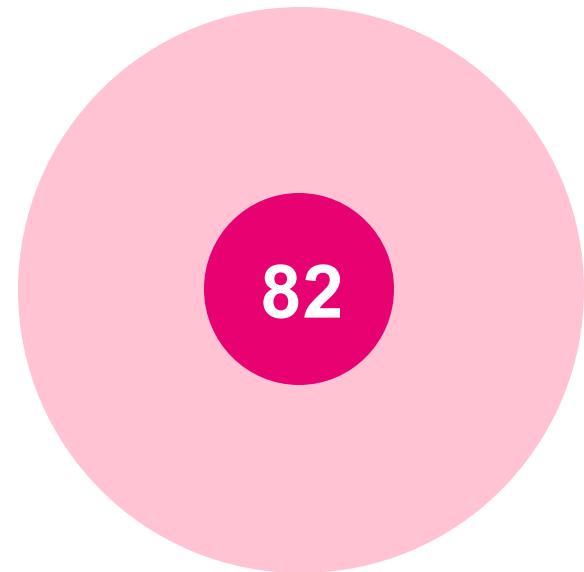

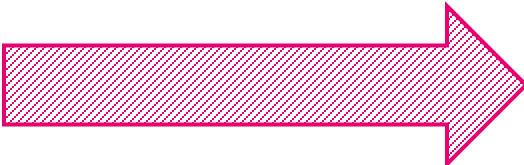

unique labels describing payslip
